

This exploded perspective view illustrates the assembly of a multi-layered structure. The main components include a central rectangular frame (1) and several long, narrow strips (2, 3, 18, 19, 24, 27). These strips are secured to the frame using various fasteners: screws (6, 9, 10, 11, 12, 13, 14, 15, 16, 20, 21, 22), pins (7, 8), and clips (4, 5). The assembly also features internal structural elements like a grid-like plate (15) and a series of small, rectangular components (17) that appear to be part of a sliding or adjustable mechanism. The exploded view shows the relative positions and alignment of these parts for assembly.
